

Please create an effective way for those of us who are being literally harrassed in our own homes simply because we own a telephone.

Please help create an effective tool for Nationwide DO NOT CALL lists that can be enforced so that private, law abiding citizens can eat dinner, take naps, talk to friends & family uninterrupted, & enjoy our home WITHOUT the constant barrage of unwanted, telemarketing firms bombarding us with endless machine dialed calls. Many firms are interrupting our lives & not even bothering to be on the other end if they get too many answers at once--just waking us up for dead air. Or, just as bad, we are being woken up from a deep sleep to hear a recorded message that further interferes in our ability to get legitimate calls.

I have missed very important calls from friends & family due to this unregulated industry, not to mention endured countless--literally 10 a night sometimes--calls inhibiting my ability to live peacefully at home.

THERE HAS TO BE REGULATION to reign in this corporate pestilance. Thank you.
